Summary

B.Sc. graduate (2024) pursuing an MBA in Data Science & Business Analytics. **Investigated business problems end to end**: modelled and cleaned 300K+ rows across SQL and Excel projects, tested hypotheses to find root causes, validated data before reporting, and built Power BI and Excel dashboards. All projects are documented on GitHub.

Technical Skills

- **SQL (PostgreSQL):** joins, CTEs, window functions (LAG, RANK, ROW_NUMBER), CASE, views, data-quality checks
- **Excel:** Power Query, PivotTables, PivotCharts, slicers, XLOOKUP, COUNTIFS/AVERAGEIFS, IFS, data validation; VBA (basic)
- **Python:** pandas, NumPy, Matplotlib, pytest
- **BI & analysis:** Power BI (DAX, modelling), Tableau; data cleaning, EDA, KPI reporting, root-cause analysis, statistics

Soft Skills

- **Working style:** attention to detail, structured problem-solving, following procedures, documentation, meeting deadlines
- **Communication:** clear written summaries, stakeholder updates, escalation
- **Languages:** English, Hindi, Marathi, Gujarati, Telugu (basic)

Education

- **MBA, Data Science & Business Analytics**, **Dr. DY Patil University (Online)**, Navi Mumbai, Maharashtra | 2026–present
- **B.Sc. Microbiology**, Dhote Bandhu Science College, Gondia, Maharashtra | 2024

Projects

DockCheck: Shipment Delay Investigation (public data) | SQL (PostgreSQL)

- Investigated why **57.3%** of **62,897** shipped orders were late; normalised **180K** rows into **6** linked tables
- Ruled out market and time; traced delays to a 1-day First Class promise that took 2 days (realistic promises: **34.3%** late)
- Identified and handled **9** data-quality issues, incl. canceled orders that would have distorted the late rate

ParcelProbe: Seller Order Issue Investigation (public data) | Excel (Power Query, PivotTables)

- Cleaned **128,975** Amazon.in order lines in Power Query; found merchant-fulfilled orders cancel at **17.5%** vs **12.8%**, higher in every category
- Built a **420**-case tracker with priority, SLA ageing and owner, and a PivotChart dashboard with slicers

CreditPulse: Loan Portfolio Risk Analytics (synthetic data) | SQL, Python

- Classified **2,608** loans (**48,263** EMIs) into RBI past-due buckets: GNPA **3.96%**, PAR 30 **4.59%**; cross-checked SQL and Python results
- Validated an application scorecard: band D went 30+ days late **5.2x** as often as band A

Adidas US Sales Analysis (real data) | Power BI

- Designed a dashboard on **9,648** transactions: **$899.9M** sales, **$332.1M** profit (**36.9%** margin); sales peaked in July and the West led (**$269.7M**)

Job Simulations (Forage)

- **Deloitte, Data Analytics**: cleaned and classified data in Excel and built a Tableau dashboard of key metrics
- **Tata Group, GenAI Powered Data Analytics**: GenAI-assisted EDA and data-quality checks; proposed a delinquency risk framework
- **Goldman Sachs, Operations** (Aug 2025): investigated trade settlement and asset transfer issues in financial data

Certifications

- **Google Data Analytics Professional Certificate** (Google, Coursera) | In progress: 3 of 8 courses, expected Jan 2027
- Power BI with AI, **Internshala** | 2026, 96%, top performer
- Ultimate Tableau Mastery, **Skill Course** | 2026
- 30 Days SQL and Python, **Skill Course** | 2026
- Business Analytics with AI, **Internshala** | 2026
- Google AI Professional Certificate, **Google** (Coursera)
- Business Communication, **Internshala** | top performer
